Progress Update Pictures

The renovated classrooms at both Kugitura and Sorore Primary schools.

Progress of the VIP latrines

Locally modified store for storage and preservation

The already finished store is already being used with potatoes being stored and preserved, the preserved commodities can stay up to 6 months as recommended by the County Agriculturist.

Agricultural officer meeting with the formed caregiver groups on food production and the availability of the market

Sub County Nutritionists with caregivers on good nutrition practices for the children that could keep them in school while avoiding diseases that may be caused by the same.

Caregivers registering for National Hospital Insurance Cover (NHIF)

Campaign against FGM

Girls rescued from FGM and marriage, they are ready to rejoin school

Women practicing FGM are included in the project after abolishing the practice, we are linking with the department of health to train them on health issue and for them to conduct health and menstrual hygiene for girls affected by FGM both in school and community.

Pupils and teachers at Sorore Primary school post for the photo behind and almost completed classroom.
