Changing Lives By Thinking Small

for the gift of mobility

Two FOSCiM Mzungu Imposters with The Workshop Team.

October 2018

Workshop manager, Wilson Nanungu explaining to visiting Luton Sixth Form College Students how the workshop operates.

Summer 2018

9 more wheelchair cases

Isaac is 11 years old
Sakhome, Nkhumba,
Phalombe
Cerebral Palsy secondary to
Cerebral Malaria at 1 week old

Letisha is 8 years old

Dzanyama, Ntchema,

Chiladzulu

Cerebral Palsy secondary
to premature birth

Pemphero is 4 years old
Chitando, Ntchema,
Chiladzulu
Cerebral Palsy secondary
to delayed birth

Rabecca is 6 years old
Namphu Chabuka, Kaduya
Phalombe
Cerebral Palsy secondary
to delayed birth

Shyreen is 11 years old
Namilaumbu, Chanthunya
Balaka
Cerebral Palsy secondary
to Birth Aspyxia

Francis is 11 years old
Thendo, Ngabu
Chikhwawa
Cerebral Palsy
source unknown

Joyce is 9 years old
Ligomba, Mthiramanja,
Thyolo
Cerebral Palsy secondary
to Cerebral Malaria

Brian is 7 years old
Chinganira, Ntchema,
Chiladzulu
Cerebral Palsy
source unknown

Yamikani is 11 years old
Chilinkha, Ngabu,
Chikhwawa
Cerebral Palsy
source unknown

Family responses

Surprised, overwhelmed, tearful, but very, very grateful all of the families had similar reactions when told that their children would be assessed, fitted and supplied with a wheelchair funded through the generosity of Kitchen Table Charities Trust.

IMMOBILITY in MALAWI

If life for the average, 'healthy' Malawian child is poor then life for those with severe mobility problems can be dire.

The consequences for the child and its family can be many and debilitating.

The Government of Malawi does not provide mobility aids.

Even if they could find them, most families would not be able to afford a mobility aid for their child.

Without a mobility aid the child cannot go to school and will have a very limited social life.

If the child cannot go to school, in most cases this restricts both parents from working therefore impacting the family income needed just to survive.

Without a mobility aid, like a wheelchair, parents and guardians carry the child on their backs. As the child grows the weight causes back problems for the adults....and so the above negative cycle continues.

The prosthetics workshop at the Queen Elizabeth Central Hospital, Blantyre, Malawi has been developed to make wheelchairs, home static chairs and orthoses each to meet the specific needs of those children fortunate enough to receive charitable funds to meet the cost.
